## The Men's March to End Violence Against Women

### THE MEN'S PLEDGE

I recognize how the patriarchy benefits me, and will work to dismantle and call out the structures that perpetuate gender-based violence.

I will actively work to reveal, know, and overcome our gender biases.

I will actively work to end men's gender-based violence.

I will actively deconstruct patriarchy and toxic masculinity and re/construct and co/construct gender identities and gender relations that are:

- more supportive to those who identify as male; masculinities that do not diminish the identities or roles of anyone identifying as female, femme, nonbinary, or non masculine; and, masculinities that support a more ethical relationship to the earth and fellow living beings.
